S. P. LANGLEY, Secretary

G. BROWN GOODE, Assistant Secretary,  
in charge of U. S. National Museum

Washington, Novr. 2<sup>d</sup>, 1889

Professor Sereus Watson. Harvard Univ.

Dear Sir:

I have received your favor of 30<sup>th</sup> ult. and the 8<sup>th</sup> volume of Bull. de la soc. bot. de France, which I return herewith, and beg you accept my best thanks; you have made me a very great favor, since Mr. Godron's paper was very important to me to know.

I take the opportunity to communicate you, that I have taken my private herbarium along with me to here, where <sup>and vascular cryptogamous</sup> most of the European phanerogamous plants are represented, and quite especially from the arctic region, where I have travelled, Greenland and Nova-Scotia &c., if you might want some fine specimens for comparison, I shall gladly lend them to you. Yours very respectfully  
A. S. Holm
